Gusset Seal

A Gusseted Bag is a flat-style bag manufactured with both sides tucked in to form gussets. Where indented, the bag is sealed through four layers of film while the middle of the bag, has only two. This leads to a potentially weak bottom seal.

Flat Seal

A Flat Seal is a two-dimensional bag with a bottom seal, much like a pillow case. Though Flat Seals are strong, they may have a tendency to leak wet trash from the corners. Also, they do not conform well to the shape of most trash receptacles.

Star Seal

The Star Seal is the **most common type** of seal on the market. Designed without gussets, the Star Seal eliminates gaps along the seal where leaks can occur. This allows the bag to more easily conform to the shape of the container and distributes refuse weight evenly inside the bag. Star Seal liners maximize the bag's carrying capacity and virtually eliminate leaks.
